servian_

A little bit about us

Servian was founded in 2008 and is regarded as on of Australia's most trusted consultancies and IT advisors. Data, Cloud, and DevOps is our heritage and has always been at the core of everything we do at Servian. Our mission is to enable our clients by enhancing their capability to deliver meaningful services to their customers, using modern technologies and methodologies driven by data and analytics.

Our experience in delivering solutions across many different platforms and industries strengthens our ability to provide the right solution to solve our client pain-points.

The Servian consultant

At the core of Servian's continued success are its Consultants.

Servian consultants engage with the business to give expert advice, solve problems and deliver Data, Analytics, Digital, AI, Customer, Cloud and DevOps, and Security solutions, by drawing on years of experience across diverse projects, industries and technologies. Good technologists matter and we hire some of the best and brightest minds through a rigorous vetting process that is based on IQ, passion and problem solving skills. Our consultants use their extensive set of skills and expertise to provide optimum assistance to help benefit your business.

- Web personalization
- Web analytics auditing and reporting
- Digital platform design and build - Front End, Back End, Full Stack and Web personalization

Customer engagement

Our Customer service domain is aimed at helping our clients build personalised, targeted conversations with their customers to enable new customer acquisition, cross-sell, upsell and retention initiatives. We partner with industry leading vendors to provide complete turn key marketing automation solutions to enhance ROI on marketing initiatives.
Our services include:

- Customer Intelligence: Analytics and Insights
- Marketing Automation & Optimisation
- Campaign Design, Development and Management Services
- Next Best Action & Decisioning
- Marketing Performance Reporting
- Digital Tracking & Personalisation

Cloud & DevOps

We partner with leading cloud vendors including Google Cloud, Amazon Web Services, and Microsoft Azure. Partnering with all providers allows Servian to offer customised, tailored cloud offerings with the best cloud configuration available on the market.
Our services include:

- AWS, Google Cloud, and Azure Solution Architecture
- Data Centre and Application Migration
- DevOps & CI/CD Uplift
- Cloud Foundation
- Application Re-architecture for Integration with Cloud Native Services
- Servian Academy
- DevOps, Cloud, and Agile Compass
- Hashicorp Vault, Terraform, Consul deployment, integration, and training

Cyber security

At Servian, we want to shake things up in the security world. Our goal is for our security work to be hands on and at the absolute forefront of technology. As such, all of our security team spend at least 30% of time each year working in dedicated, non-security, delivery roles.
Our services include:

- Penetration Testing
- Security Architecture Services
- DevSecOPs
- Code Review and Training
- Audit
- Managed Services
