

# Embedded finance ecosystems

- *Adhikar Babu (Worldpay)*

**First a quick refresher...**

# Embedded Finance is an integrated financial product...

- **Integrated**

- Happens within the brand's digital experience
- Automated (mostly)

Auto payments

Swiping card after ride

# ...seamlessly showing up...

- **Integrated**

- Happens within the brand's digital experience
- Automated (mostly)

- **Seamless**

- Driven by the customer directly
- Provides brand control over CX to some extent

Pre-approved financing

*Lending*

Application based  
financing

# Embedded Finance is an integrated financial product seamlessly showing up **at the point of need**

- **Integrated**

- Happens within the brand's digital experience
- Automated (mostly)

- **Seamless**

- Driven by the customer directly
- Provides brand control over CX to some extent

- **Point of Need**

- The core activity is “not finance”
- Shows up at the right context

**Auto payments  
after ride**

*Payments*

**Swiping card after ride**

**Pre-approved financing**

*Lending*

**Application based  
financing**

**Marketplace banking**

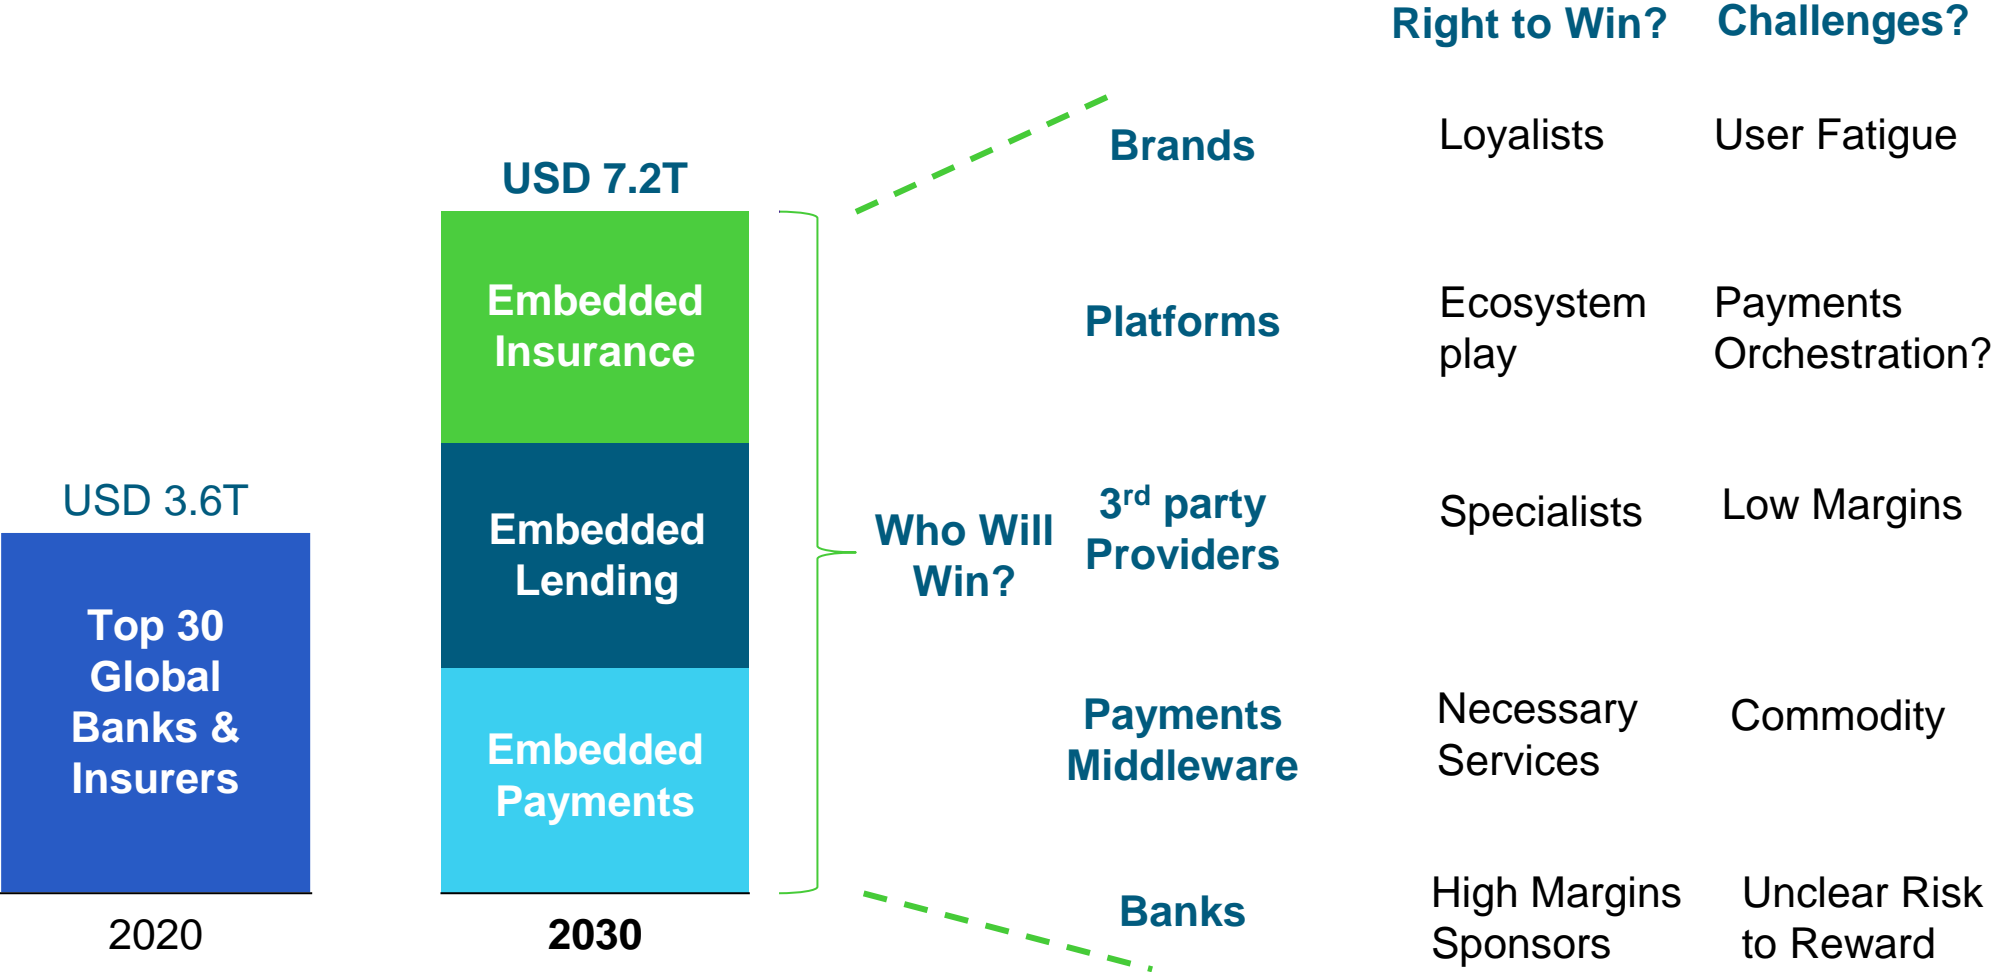

*Banking*

**Merchant accounts**

**Convenience and Digital are key enablers for end-consumers and SMBs**

# Globally, several players are jostling to win in the Embedded Finance market set to reach USD 7.2T<sup>1</sup> by 2030

**Defining the value chain...**

# The Embedded finance value chain begins with the “embedders” at the front-end...

## The Embedded Finance Value Chain stack

...with traditional big banks forming the balance sheet end...

The Embedded Finance Value Chain stack

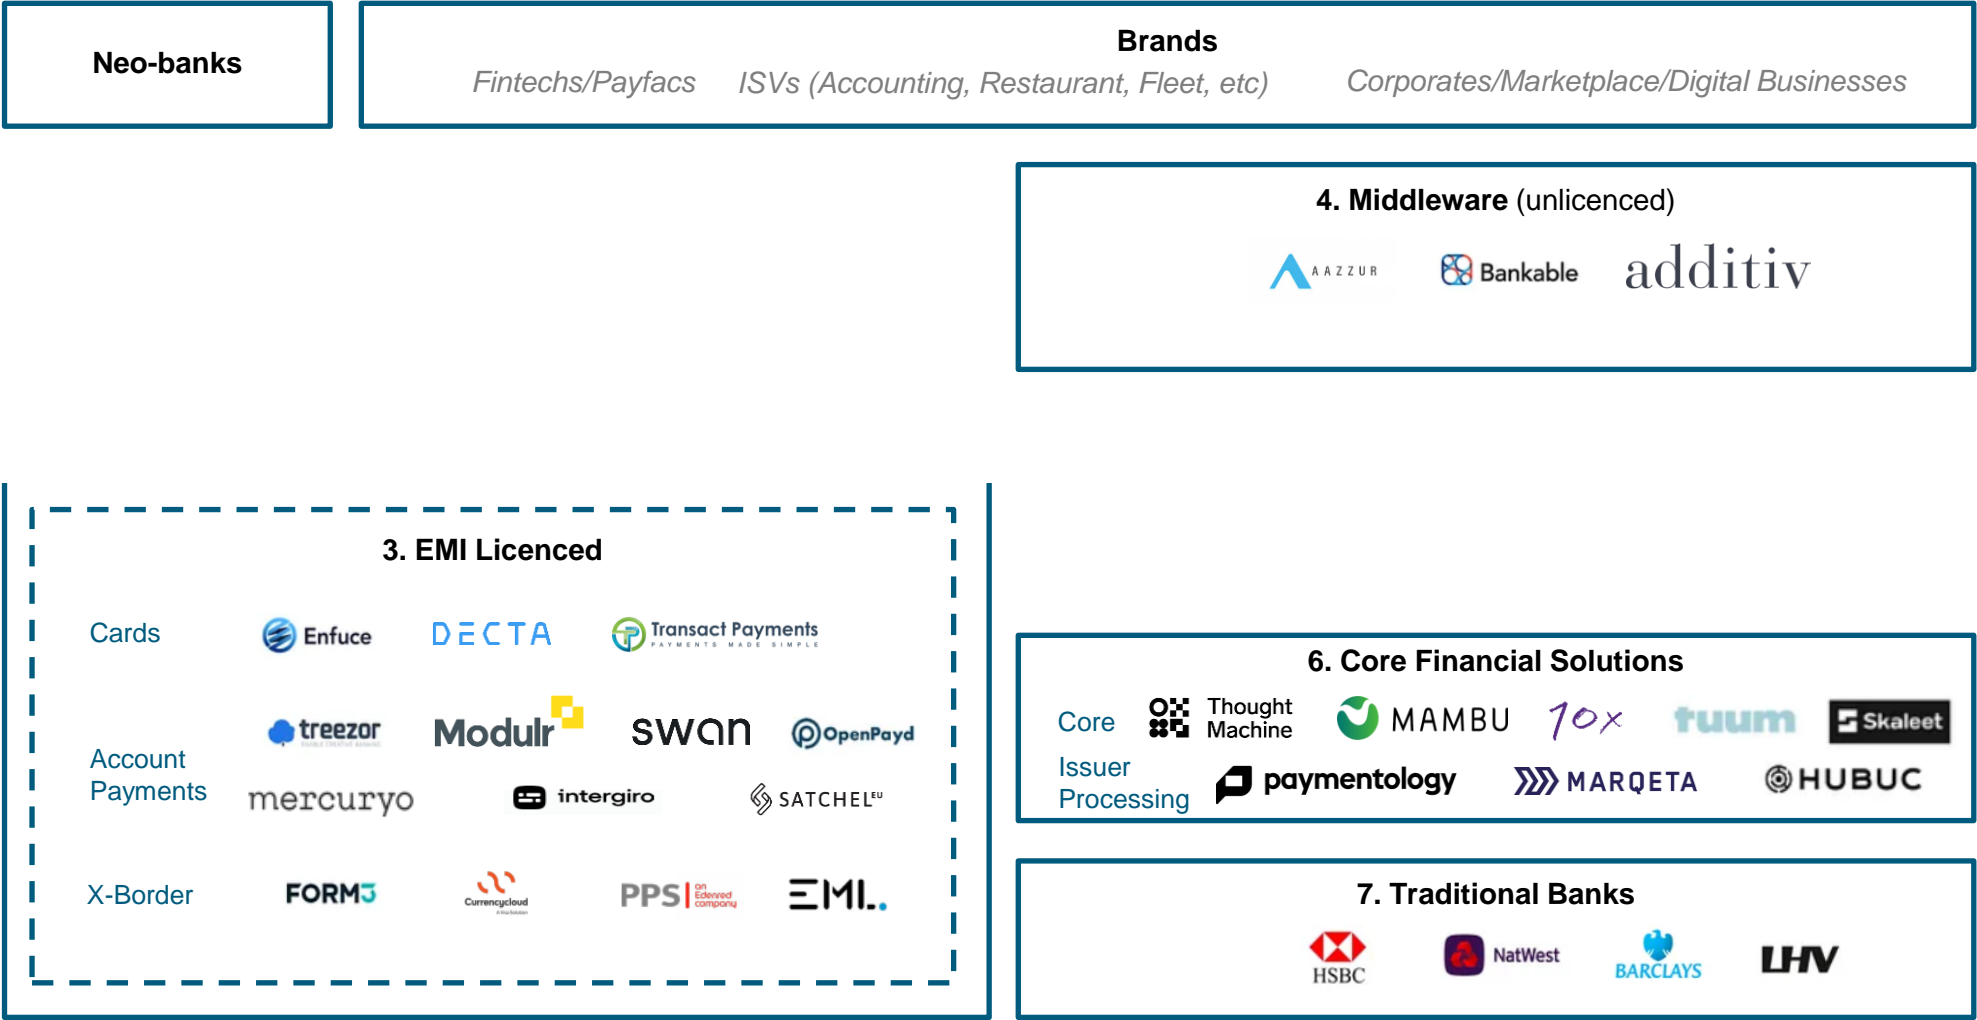

...followed by the core financial software providers...

The Embedded Finance Value Chain stack

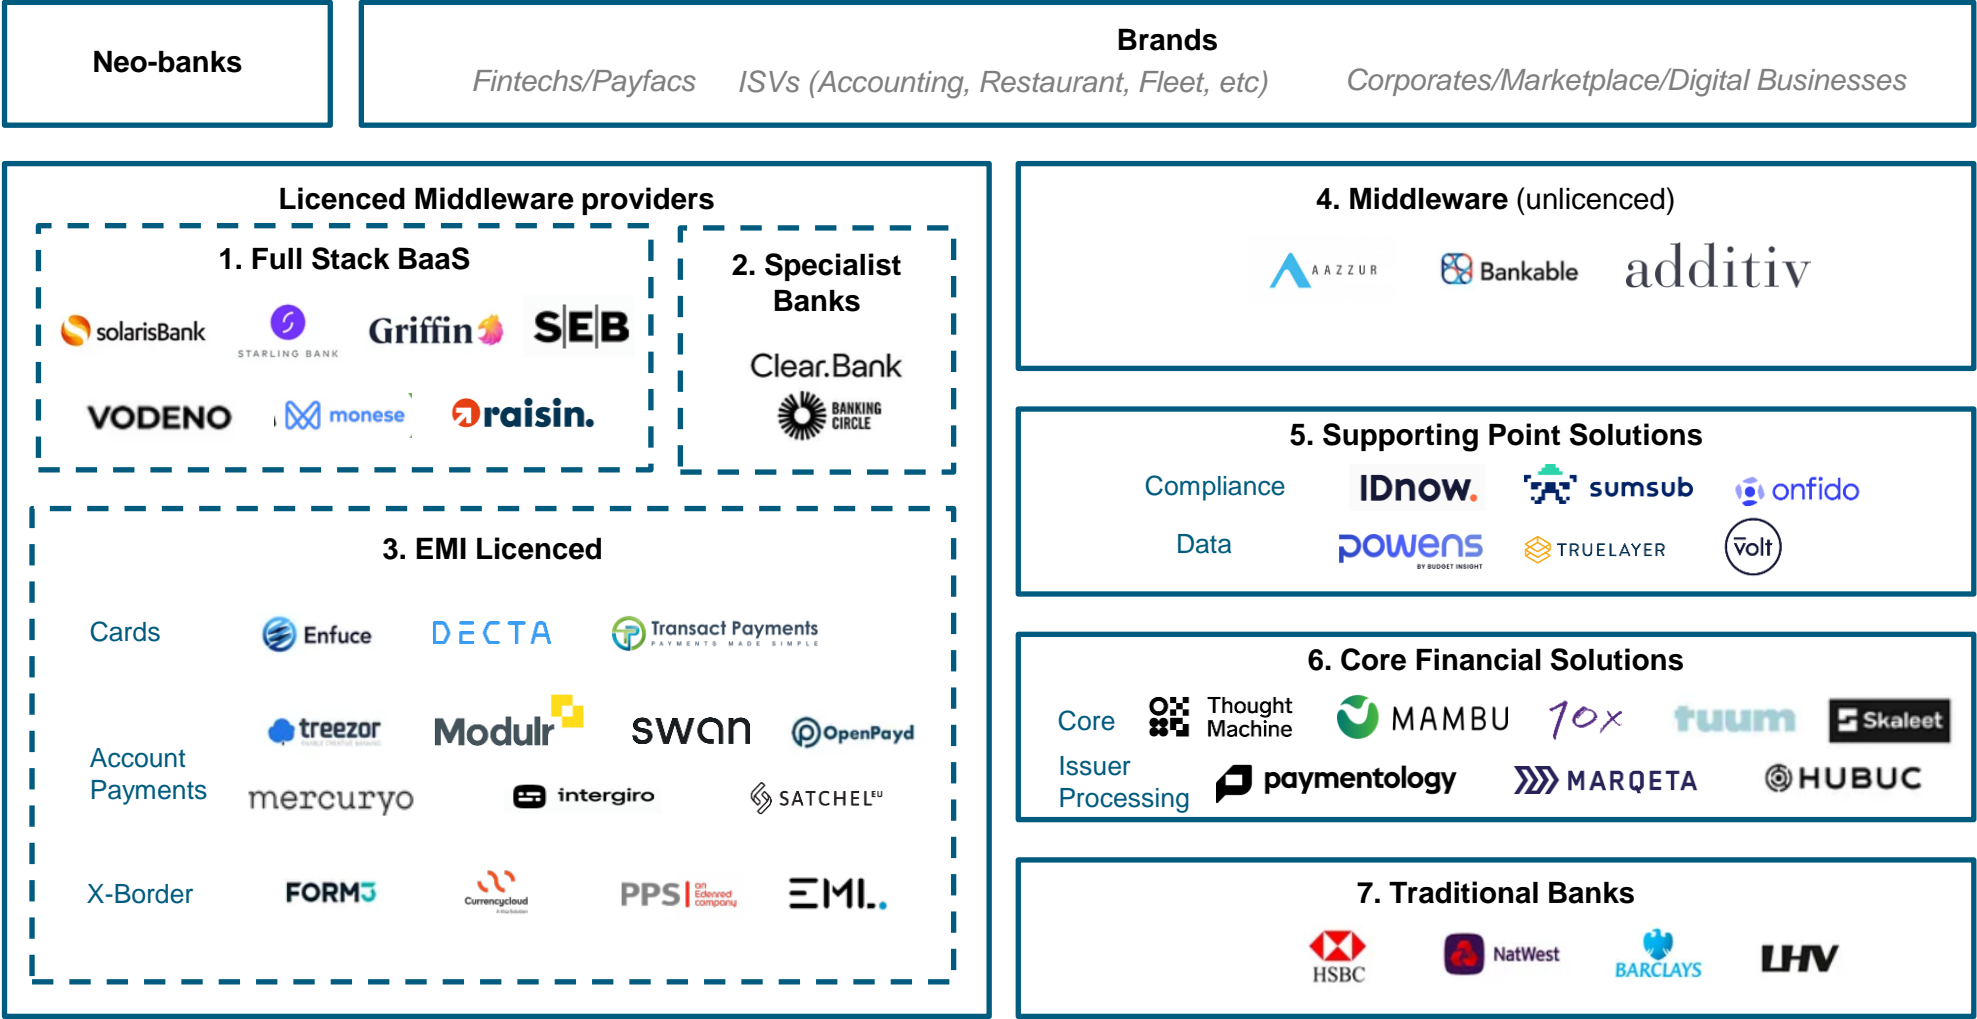

...and now the two API-driven specialist layers...

The Embedded Finance Value Chain stack

# ...going deeper into the embedded finance space to form the full ecosystem

## The Embedded Finance Value Chain stack

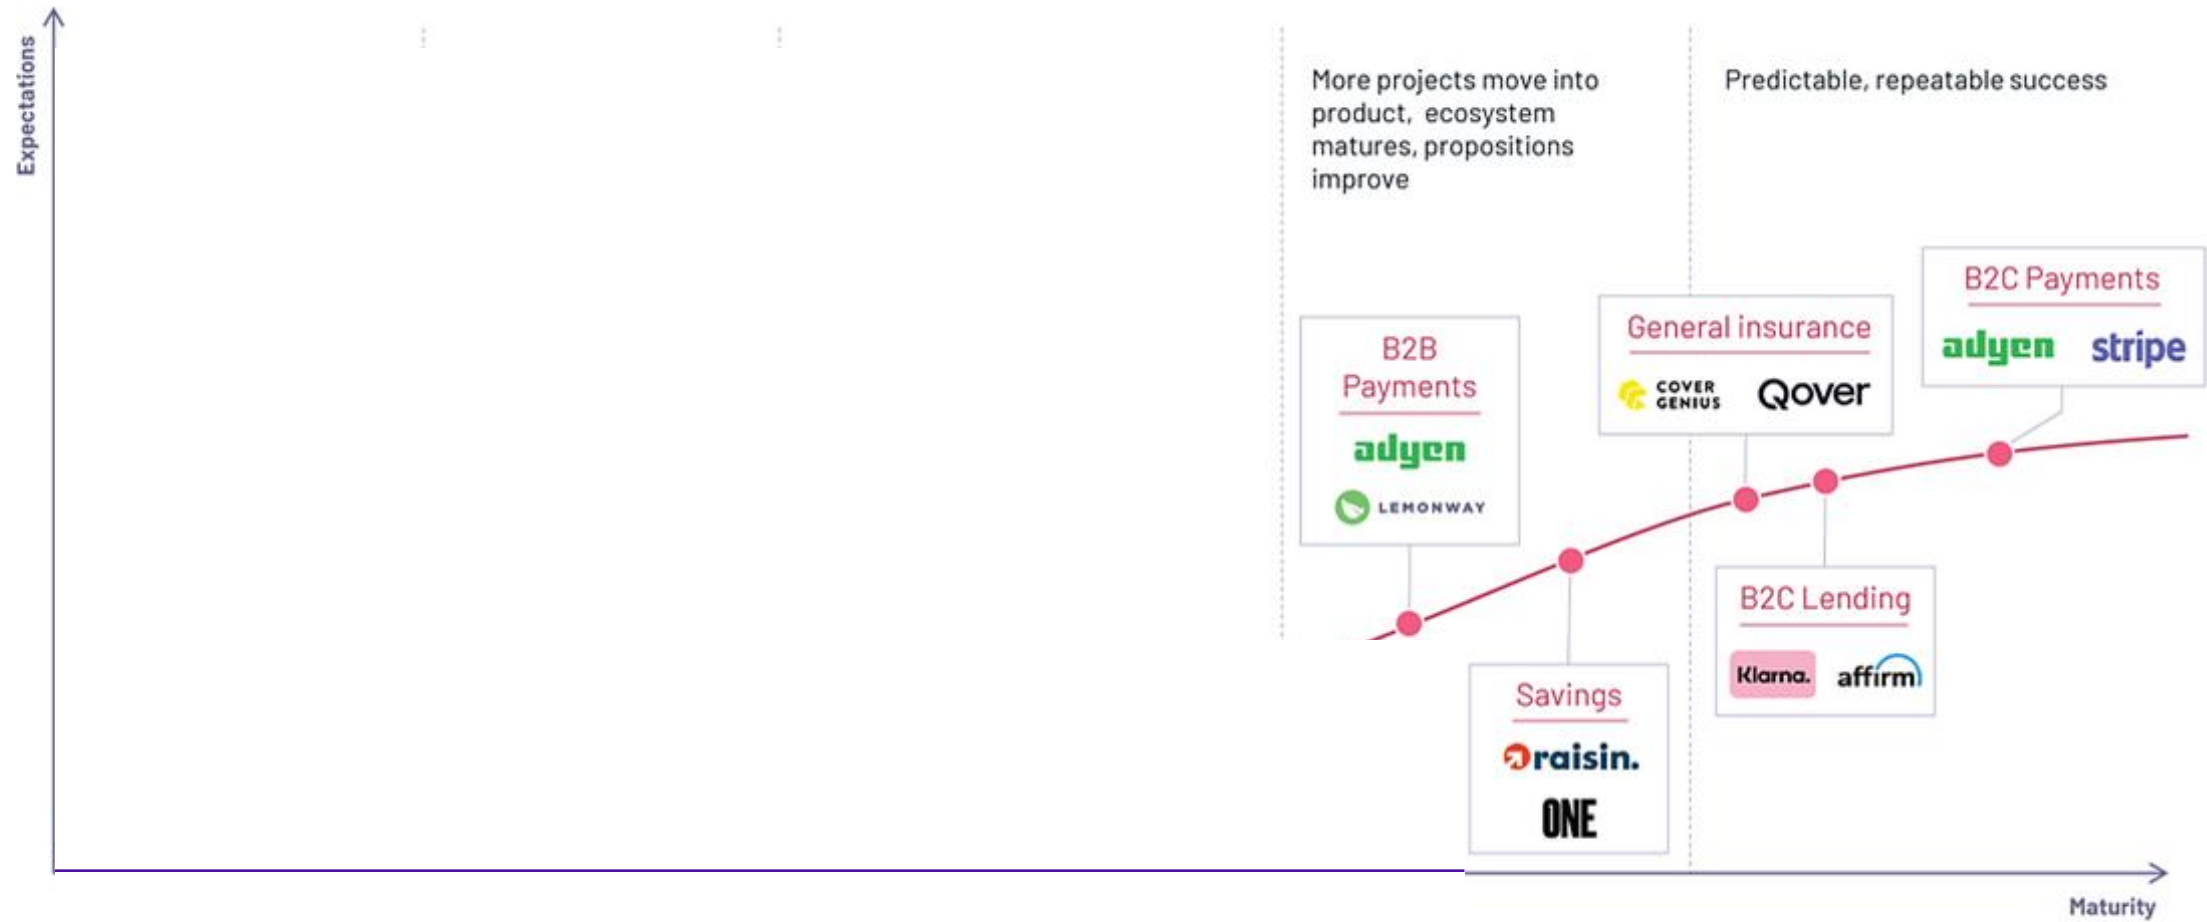

**The evolution...**

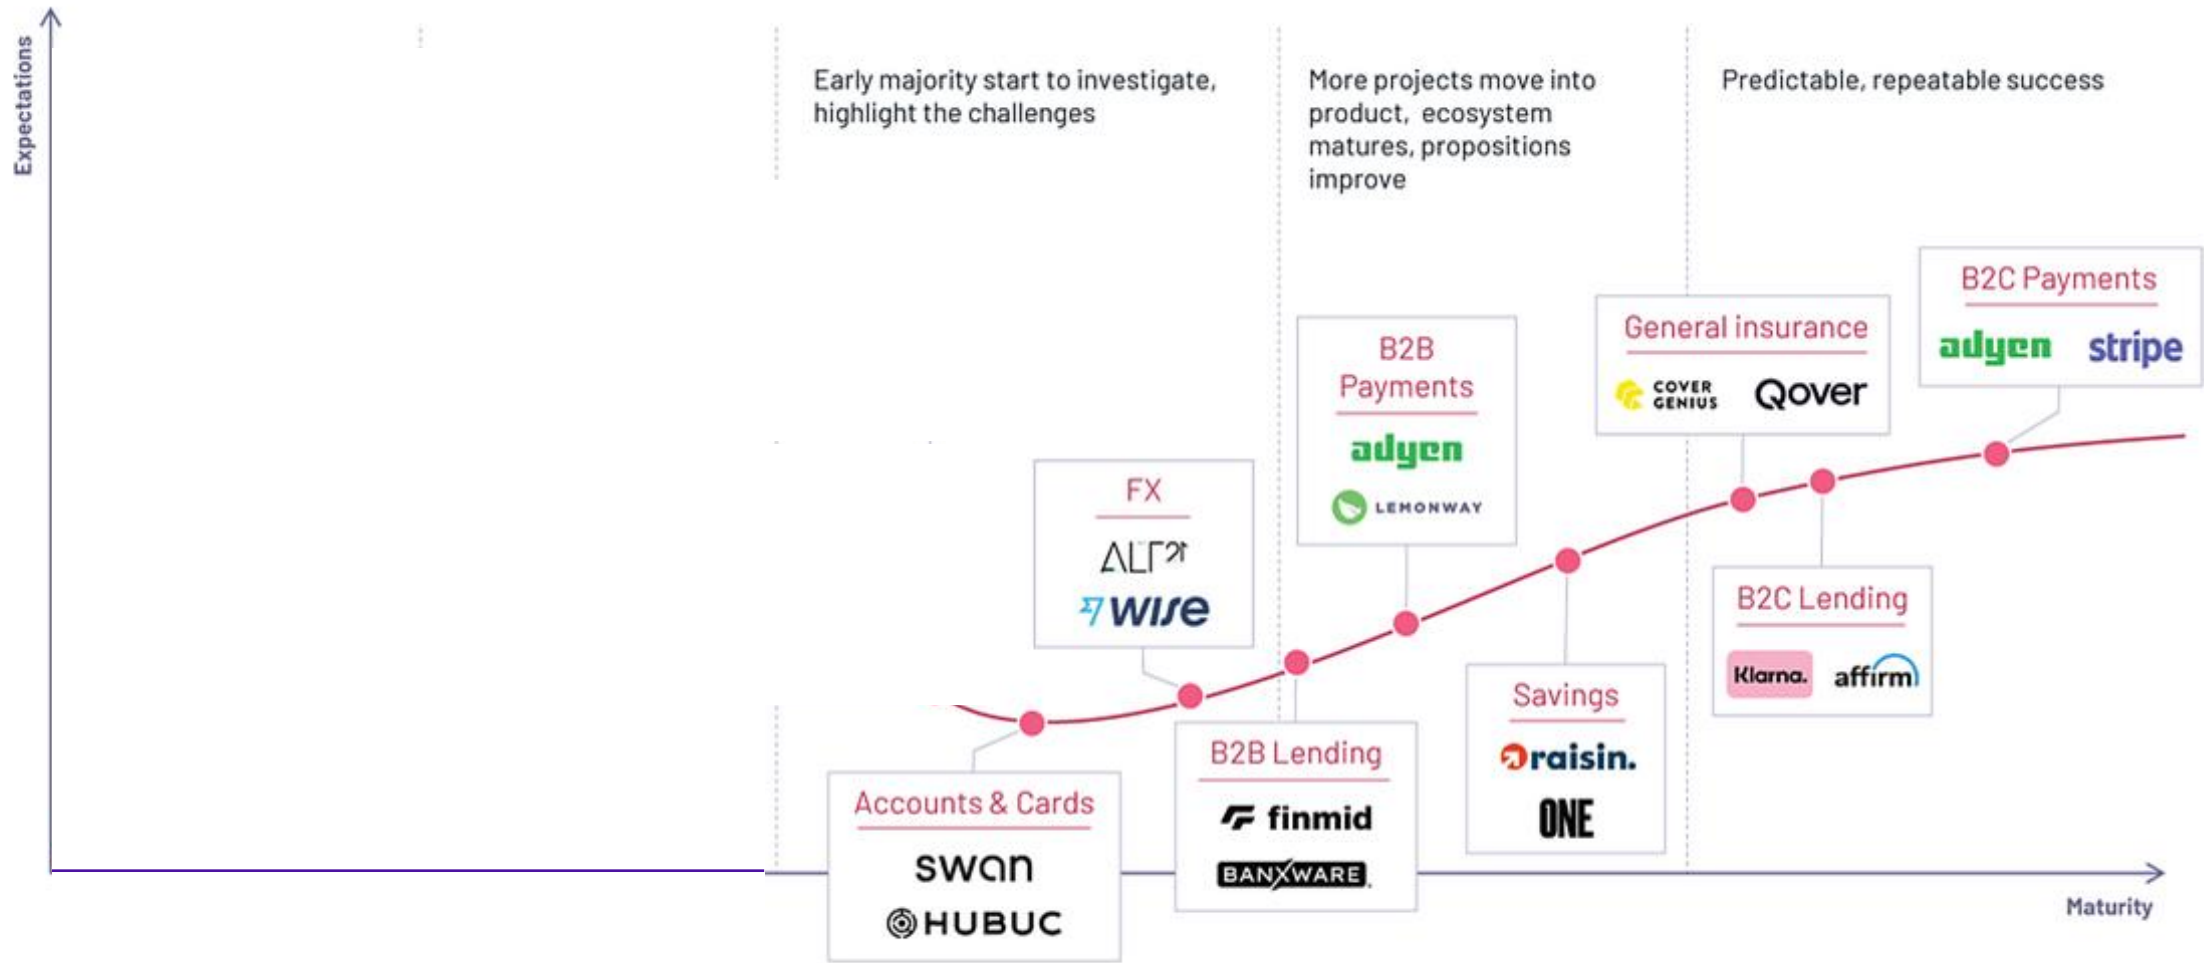

# The past: Consumer payments

# The present: Consumer banking + Initial foray in B2B

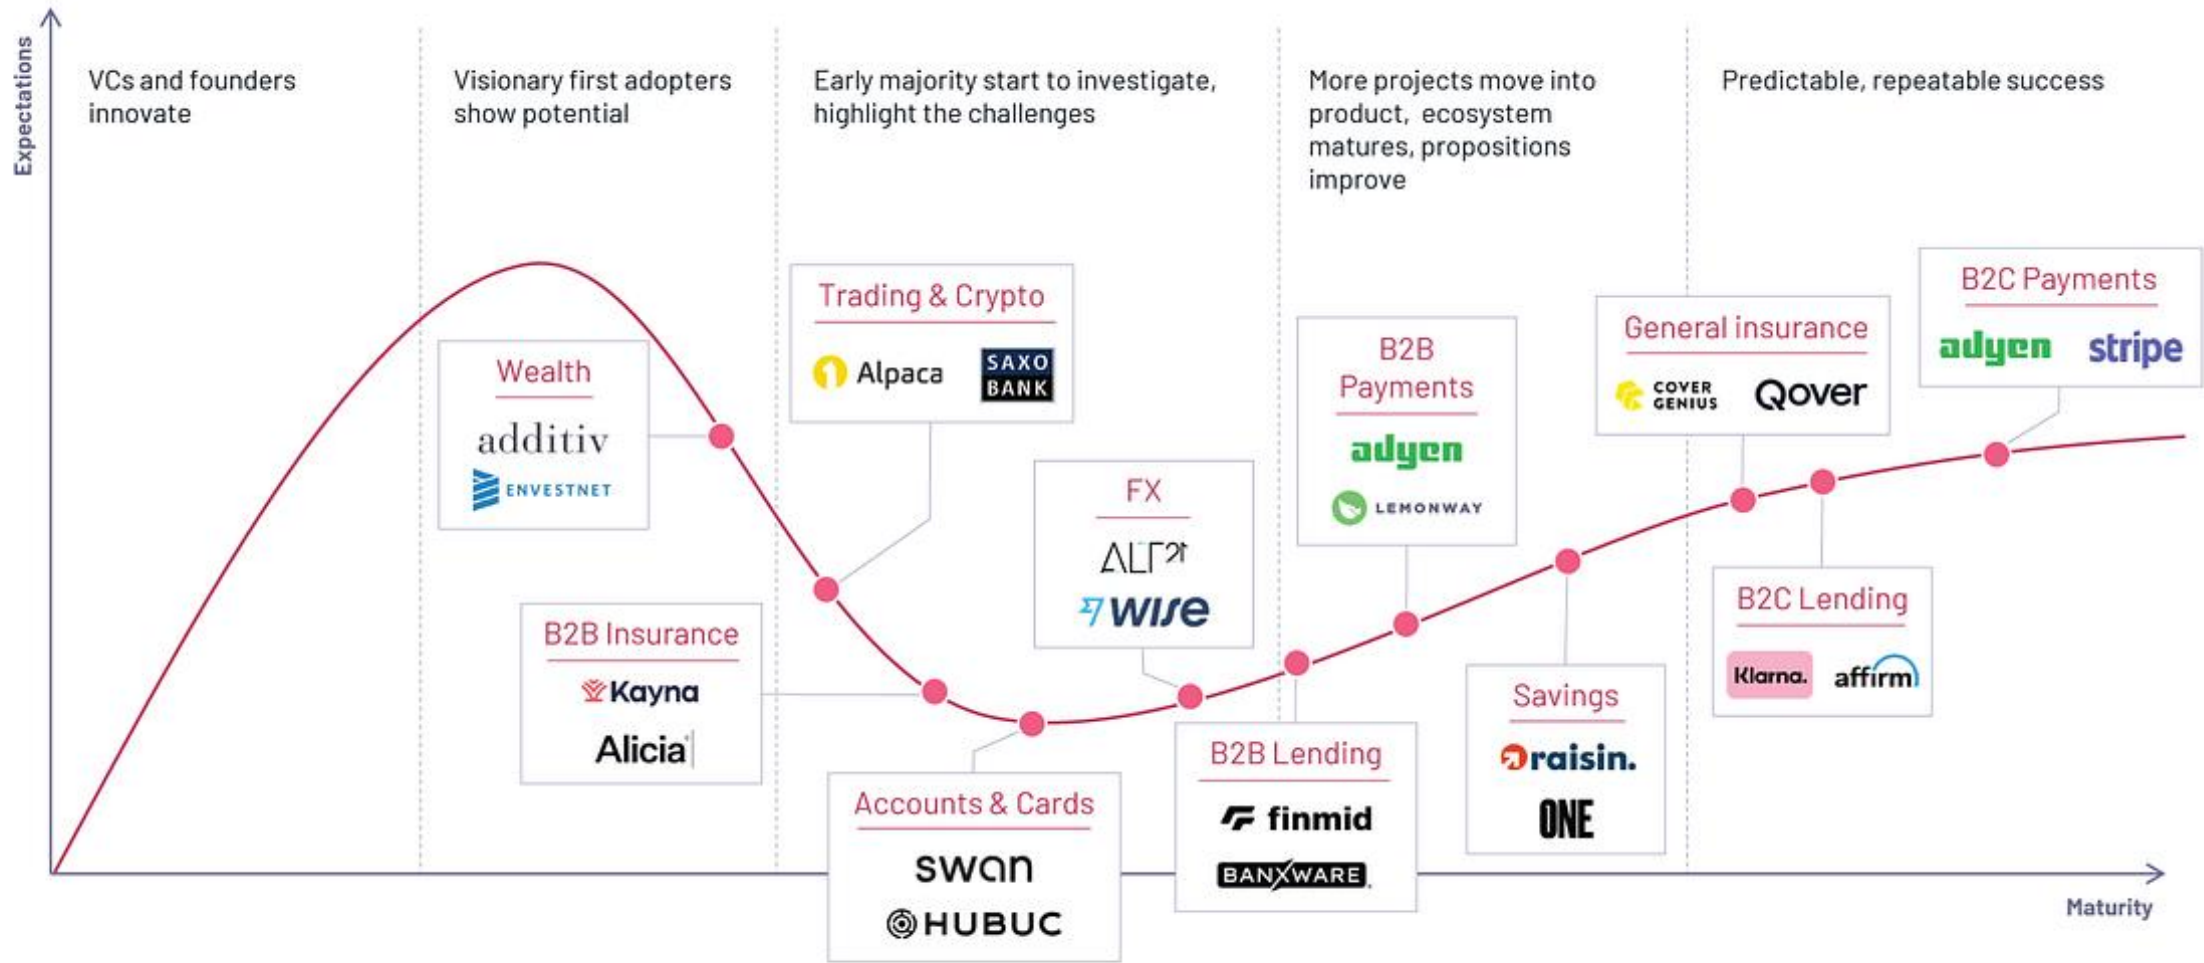

# The present “tense”: Accounts & Cards as a service + B2B Financing

# The future? B2B Trade Financing, Wealth/Treasury management, insurance

**What's next?**

# Watch out for

---

**Rising interest from Big Banks, Card Networks, Legacy Payment Cos**

---

**Shifting VC focus on product and tech specialists**

---

**Expanding B2B2X use-cases possibly targeting lending & insurance**

---

**Emerging ecosystems created by the Big tech firms**

---

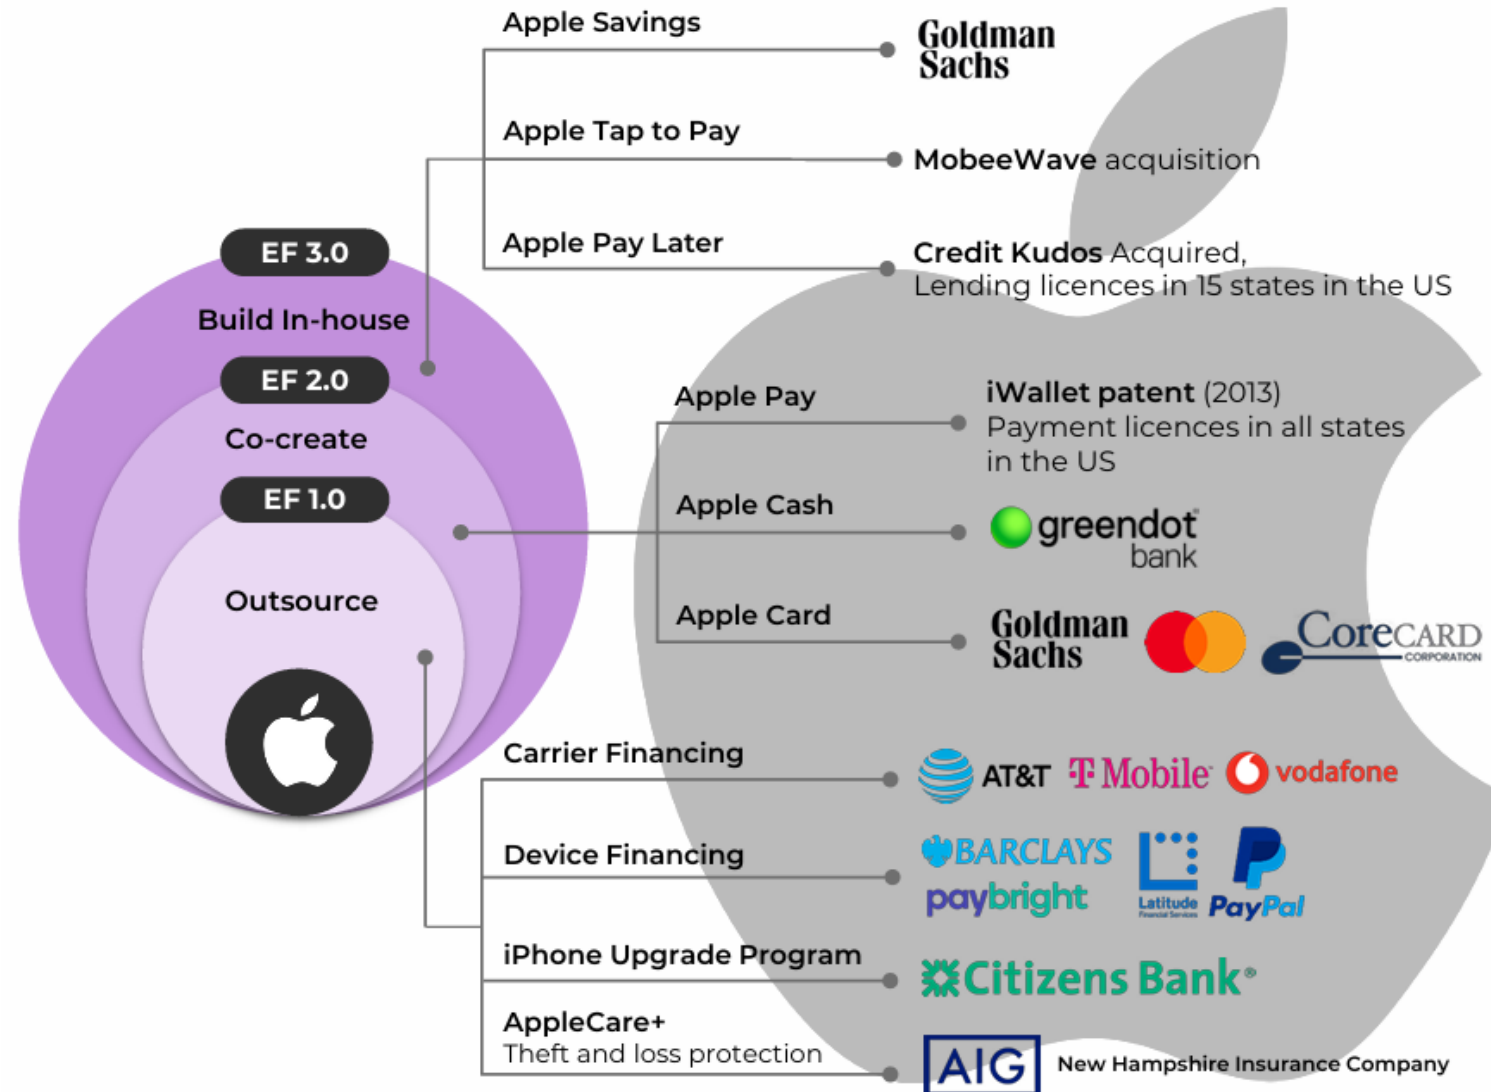

**AI unlocking embedded finance**

---

**Consolidation amidst regulatory/profit concerns**

---

# Apple's world of embedded finance

**Questions?**
