Don't take our word for it. See what previous attendees say!

"Great experience"

The conference was well organized: sessions and timing were good, technology was working, food was tasty and arranged well. The event provided ample networking opportunities. I had a great experience.

- Janos Perge, Principal
Data Scientist, CVS

"The best"

The best summit I have ever attended... it is a MUST if you want to know what is going to happen in the deep learning field

- CEO, MedicSen

"High level"

The talks were great and of a high level, I had a great time moving between the two tracks.

- Ilona Bartman, Medical Education
Research Associate, Medical Council
of Canada

"The value in attending for me was: learning about the state of the art methods in Deep Learning. What is done with it, how much data a crunched in a usual application, which infrastructure is needed? Limitations? Also to make contacts to companies and researchers."

- Data Scientist, Bayer

"I found the Summit really cool and inspiring. In contrast to many conferences out there, it had a real depth to some technical topics and a good mix with use-case core learnings based talks. Really good quality."
