

About Data4Good

Our mission is to inspire and enable people so that we can use our skills and passion to benefit humanity.

“Changing the world one byte at a time”

Volunteering

Data4Good enables not-for-profits to get more insights from their data, without the cost of resourcing being a restrictive factor. We work with both individual and corporate volunteers, matching their skills and passions to NFP data projects. It's a win-win as volunteers get immense satisfaction from working on projects that make a difference for good in the world.

Projects

Not for Profits have the same data needs as any other organisation – they want to be data driven, have access to data insights, do predictive analytics, and have strong data governance. Their data needs cover the whole spectrum and, if it's data focussed, we're here to help. We match volunteers to NFP data projects to help them do more of what they do best and make the world a better place.

Corporate Social Responsibility

We're looking to grow our capacity by forming partnerships with new organisations. We have a range of sponsorship opportunities from supporting specific events to our team building option that allows your staff to work together, with the flow on effects of increased job satisfaction, staff engagement and team development.

Join the movement by contacting us about becoming a Data4Good volunteer or sponsor.
