

## Overview

InterWorks is a people-focused, data consultancy delivering premier service and expertise in collaboration with strategic partners. Our clients trust us to guide them toward the best solutions to maximise their data. We empower people at every step of the data and analytics experience, from management and storage to communication of insights through visualisation.

## A Few of Our Clients

## About Us

With over 27 years of global experience, InterWorks primary mission from the very beginning was to be the very best solutions provider in data and analytics. We believe in an agile approach to solving data problems with an emphasis on speed-to-value, scalability, and cost efficiency.

Our team of consultants have, on average, more than 16 years experience. We believe that our pedigree is evident in the depth of our expertise and breadth of our clients, including more than 8,000 clients across every industry vertical.

InterWorks has expanded both nationally and globally, opening offices in Sydney, Melbourne, Perth, and Singapore in addition to North America and Europe.

## Recognition

These are just a few awards we're proud of from recent years:

- + First Tableau Gold Partner
- + Tableau Partner of the Year x17
- + Snowflake Partner of the Year x8
- + Fortune 2019 Small Giant
- + Dataiku Partner of the Year
- + Matillion Partner of the Year
- + Tableau Global Partner of the Year
- + ThoughtSpot Partner of the Year x2

## Key Partnerships

## Our Culture & Our People

What sets our business intelligence consultants apart is a deep understanding of all things data and analytics. When implementing a solution, it is vital that your consultancy partner has a grasp of data and BI principles on every level.

Our consultants are well versed in their data knowledge, with experience in data warehouse design, ETL development, governance, strategy, infrastructure, and advanced analytics. We've delivered more than 1.7 million hours of consulting services. This gives our clientele a complete data solution from start to finish, which is invaluable to companies both small and large.

## What We Do

From the science of data to its storage, management and visualisation, we can support you in every aspect of your data strategy. We value laying a strong foundation, and our relational approach leads us to customise solutions that meet your precise needs and empower you to do data your way.
