

# Powering your data movement with Fivetran

Fivetran automates data movement out of, into and across cloud data platforms. We automate the most time-consuming parts of the ELT process from extracts to schema drift handling to transformations, so data engineers can focus on higher-impact projects with total pipeline peace of mind. Fivetran enables leading enterprises to drive analytics, AI/ML initiatives and business growth.

## One platform for all your data movement

### Automation

Free your team to make a bigger impact

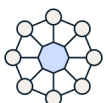

- Automated schema drift handling, normalization, deduplication, etc.
- Automated data transformation orchestration and management
- Governance and security features built in

### Reliability

Trust in secure, accurate and fresh data

- 99.9% uptime across 1M+ daily syncs
- Idempotent, self-healing, pipelines
- Regulatory compliance and security

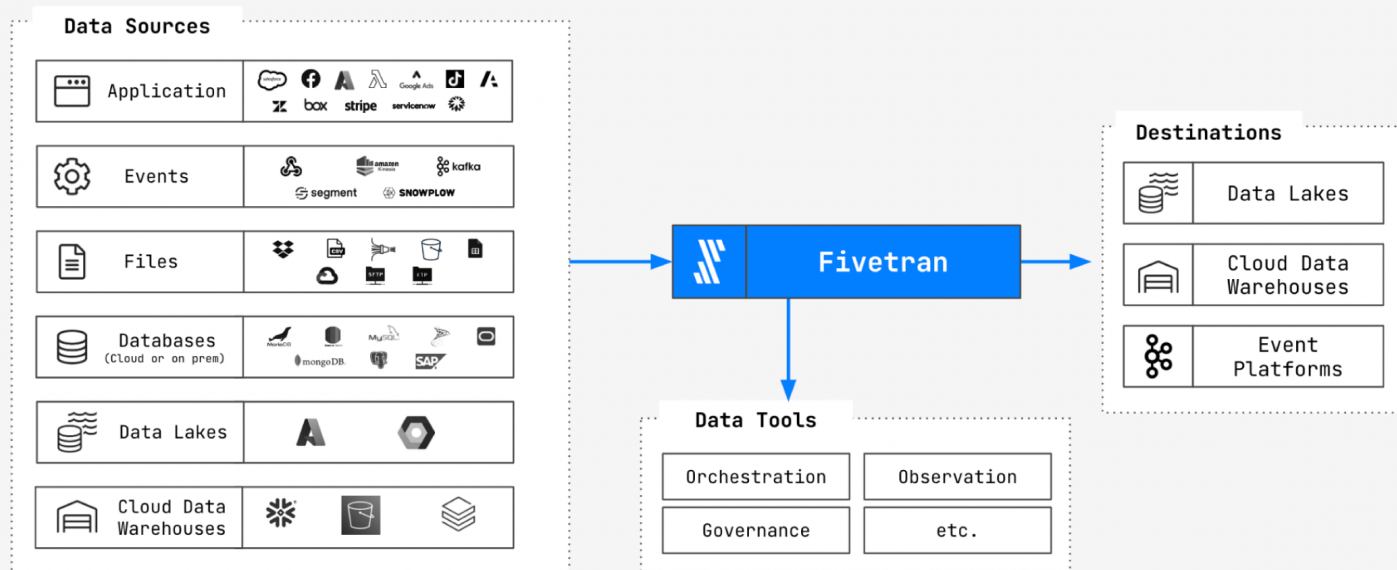

### Scalability

Leverage the flexibility to grow your team, data and business

- 300+ no-code, 5-minute setup connectors
- Real-time CDC data movement with low impact on source systems
- Fully extensible and configurable with your current data stack

## A robust architecture for high-volume, real-time data delivery

## Awards and highlights

- [Google Cloud Technology Partner of the Year 2023](#)
- Snowflake Technology Partner of the Year 2022
- Databricks Innovation Technology Partner 2022
- Gartner Peer Insights Customers' Choice
- [G2 Market Leader](#)

“

Now we spend less time on data plumbing, so we can focus on innovations like chatbots for lead qualification, and we've significantly elevated our infrastructure — a necessity for a \$20 billion public company."

**Guli Zhu**  
Head of Marketing Analytics, Square

“

Bringing our data sources into our existing SQL Server warehouse would have taken three people two years and cost about \$425,000. Fivetran got us there in two months."

**Russell Stather**  
Chief Technology Officer, Ignition Group

## Thousands of companies trust Fivetran to move business-critical data
